STATE OF CONNECTICUT SHELLFISH GROUNDS

This map collection represents the first phase of the Connecticut State Shellfish Atlas, which was designed to locate and identify the shellfish grounds in the estuarine waters of the State of Connecticut.* State and local shellfish officials and members of the shellfish industry assisted in determining locations of the shellfish beds.

Atlas-designated areas show only those grounds believed to support and produce shellfish of commercial and sport fisheries value and do not show historically productive but presently inactive shellfish areas. Of the leased grounds charted by the Connecticut State Shell Fish Commission, only the active portions were recorded. Typical of the coastal areas in New England, the coast of Connecticut includes varied species of shellfish but some in only limited numbers such as razor clams, mussels, soft clams, surf clams and ocean quahogs, which are scattered in small indistinct non-commercial proportions throughout the length of the coastline. These pockets of shellfish were not recorded due to their small size and limited value.

Shellfish beds were located and identified in all waters regardless of classification: closed shellfish areas prohibiting harvesting, and open areas, as well as conditionally approved classifications. Area measurements of the shellfish beds were not made at this time, but will be undertaken at a later point in the Shellfish Atlas.

*Atlases are being developed for all eastern coastal states from Maine through Delaware. The Connecticut Atlas is the first in the series; Rhode Island and Massachusetts will follow.

The Connecticut coastline was divided into 16 separate maps. The areas were established independently by showing a single estuary as one map or, in some cases, by placing two or more estuaries together as one map. No effort was made to follow state-defined regional, county, metropolitan or shellfish closure sections. For easy reference, three tables of contents were arranged as follows:

Table I - Maps located by coastal cities and towns

Table II - Maps located by open bodies of water

Table III - Maps located by state shellfish closures

State and shellfish industry members providing assistance in this phase of the report are as follows:

Connecticut State Shell Fish Commission

Mr. Ernest Bontya, Sanitary Engineer

Connecticut State Department of Public Health

Division of Sanitary Engineering

Mr. Michael Rossetti, Sanitarian

Connecticut State Department of Agriculture

Division of Natural Resources, Fish and Game

Mr. Louis Bear, Game Warden

Norman & Hillard Bloom, East Norwalk

Interstate Shipper, Connecticut 63SS

L. H. Malloy, New London

Interstate Shipper, Connecticut 76SS

Shellfish Legend:
